PROJECTS

Privacy-First Image Editor (Adobe PS)

Inter IIT TechMeet 14.0

A Web-based privacy-first image editor

- Developed a privacy-first application focusing on on-device inference.
- Integrated ONNX models and built the application using React.
- Technologies used: React, ONNX.

Toaster [Breadboard to Netlist - OELP]

IIT Palakkad

A Web-based tool to convert an image of a circuit into a netlist

- Designed a full-stack engine to automate circuit digitization by recognizing components on a breadboard using YOLOv8 and OpenCV.
- Implemented a robust pipeline to convert detected components and connections into a standard SPICE netlist for simulation.
- Technologies used: OpenCV, YOLO, React, FastAPI.

DAGer : A Mini-Git Clone in C++

Hobby Project

- Built a mini git-like tool that supports basic version control operations such as init, add, commit, status, and log.
- Implemented a content-addressable filesystem using hashing (SHA1) for data integrity and file deduplication, inspired by Git's object storage.
- Technologies used: C++, SHA1 (OpenSSL).

TECHNICAL SKILLS

Languages: Python, C, C++, OCaml, Odin

Web & App Development: HTML, CSS, JavaScript, React, Svelte

VOLUNTEER EXPERIENCE
